### Message from the Guest Editors

Our special issue is on "Interactive Machine Learning and Visual Data Mining". Methods to combine (inter)-active machine learning and Visual Data Mining (VDM) interaction approaches through the iterative process with a human-in-the-loop strategy are part of the research questions addressed in this Special Issue.

Topics for this Special Issue are (but are not limited to):

- Design and implementation of interactive machine learning/data mining systems;
- Evaluation approaches/measures of IML and VDM systems;
- User studies and Evaluation protocols;
- Active Learning strategies for IML and VDM;
- Reproducibility of interactive systems.

## Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

**Journal Rank:** [CiteScore - Q2](#) (*Information Systems*)
