

Special Issue

Computational Linguistics for Low-Resource Languages

Message from the Guest Editor

The goal of this Special Issue is to collect current research in computational linguistics for low-resource languages for a variety of languages, tasks, and applications. We invite submissions of high-quality, original technical and survey papers addressing both theoretical and practical aspects, including their ethical and social implications. We also hope that this Special Issue will not only represent a showcase for promising research but will also contribute to raising awareness about the importance of maintaining linguistic diversity, an effort to which computational linguistics can make an important contribution.

Guest Editor

Dr. Claudia Soria

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

CiteScore - Q2 (Information Systems)
