

Smart Construction in Infrastructure Project Development

Guest Editors:

Dr. Robert Osei-Kyei

School of Engineering, Design and Built Environment, Western Sydney University, Penrith, Australia

Dr. Xiaohua Jin

School of Engineering, Design and Built Environment, Western Sydney University, Penrith, Australia

Dr. Isaac Akomea-Frimpong

School of Engineering Design and Built Environment, Western Sydney University, Sydney, NSW, Australia

Deadline for manuscript submissions:

1 January 2025

Message from the Guest Editors

Smart construction has been touted as an innovative approach towards the attainment of a sustainable development agenda of every country in building and operating public infrastructure projects such as light rails, hospitals, schools, airports, and recreational centres, among others. Smart construction uses innovative and data-driven technologies in this era of the fourth Industrial Revolution to improve operational efficiency, reduce delays and costs, and ensure timely completion of these infrastructure projects. Smart construction also helps to modernize existing infrastructures and make them more resilient to different environmental conditions.

In this Special Issue, we ask for the submission of high-quality and original research manuscripts, which are focused on the application of smart construction technologies such as Artificial Intelligence, Building Information Modeling (BIM), Internet of Things (IoT), Robotics, Digital twins, Drones and Advanced Imaging, Cloud-Based Collaboration, Augmented Reality (AR) and Virtual Reality (VR), and 5G Technology in the understanding, modelling, and implementation of infrastructure project development.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group,
Department of Natural Resources
and Environmental Engineering,
School of Mining Engineering,
University of Vigo, 36310 Vigo,

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
