Dr. Iman Faridmehr

Civil Engineering Department, Faculty of Engineering, Girne American University, Via Mersin 10, Girne, Turkey

Deadline for manuscript submissions:

30 April 2025

Message from the Guest Editors

Sustainable construction materials are revolutionizing the building industry, steering it towards a zero-waste future. As the world grapples with the dual challenges of environmental degradation and resource depletion, the construction sector, known for its significant ecological footprint, is under increasing pressure to adopt sustainable practices. Traditional construction methods often rely heavily on non-renewable resources and generate substantial waste, contributing to pollution and landfill overloads.

In this Special Issue, original research articles and reviews related to sustainable construction materials, construction waste management, low-carbon materials, green construction, built environment and circular economy for building materials are welcome. Research areas may include (but are not limited to) the following:

1. Industrial and agriculture wastes recycling technology and its application;
2. Geopolymers, synthesis and design for large-scale industrial application;
3. Low-carbon materials;
4. Circular economy for building materials and life cycle assessment.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
