Deadline for manuscript submissions:

closed (31 October 2023)

Message from the Guest Editors

The Special Issue will specifically address the need to define novel safety performance functions (SPFs) and crash modification factors (CMFs) to better understand the relationship between road surface characteristics, road equipment, and accident causations. Empirical studies that focus on road-related features that have not yet been explored are especially welcome. Additionally, new theoretical, statistical, and data-driven approaches for defining SPFs and CMFs could be of interest to the present Special Issue. The Special Issue will be of great interest to academicians, researchers, and practitioners working in the fields of road safety, transportation engineering, and accident analysis. The focus on road surface characteristics and road equipment, and their impact on accident causations, will provide valuable insights for policymakers, road planners, and design engineers, who can use this information to make informed decisions and improve the road safety for all.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
