Message from the Guest Editors

Transportation infrastructures (highways, railways, ports, and airports) include physical elements (e.g. geometric, pavement, and sensors) and soft elements (e.g. algorithms and intelligent systems). In this regard, the design, optimization, management, and maintenance of transportation infrastructures are becoming more challenging in the forthcoming digital and intelligent transportation era. In the meantime, emerging technologies may provide more opportunities for enhancing different aspects of transportation infrastructures. The new sensing technologies (e.g., LiDAR) and computer vision algorithms can help automate the process of road asset inventory and infrastructure digitalization, reducing both time and costs for infrastructure administrators. In addition, the boom in artificial intelligence is reshaping the ways of infrastructure risk monitoring and enhancing transportation infrastructure safety.

We welcome papers covering new research related to all transportation modes: highways, railways, ports, and airports. Researchers from academia and industry are invited to submit articles on any topic related to the theme of the special issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
