Department of Civil and Environmental Engineering, Florida International University, 11200 SW 8th St, Miami, FL, USA

Deadline for manuscript submissions:

closed (31 August 2024)

Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Infrastructures* focuses on the intersection of artificial intelligence (AI) and risk management to develop and preserve sustainable and resilient infrastructure systems. With the increasing complexity and vulnerability of infrastructure systems worldwide, there is a growing need to integrate advanced AI technologies for risk assessment, mitigation, and overall sustainability. Articles in this Special Issue will seek to cover concepts and application of AI in infrastructure risk management, including predictive modeling, decision support systems, and real-time monitoring. Furthermore, the Special Issue also seeks to address the ethical and societal implications of deploying AI in infrastructure management, ensuring that sustainable development goals are upheld while leveraging technological advancements. By highlighting innovative methodologies, case studies, and best practices, the journal aims to foster interdisciplinary dialogue and contribute to the advancement of AI-driven approaches to building and maintaining resilient and sustainable infrastructure systems.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
