

## Urban Geotechnical Engineering

Guest Editors:

**Prof. Dr. S. Sonny Kim**

School of Environmental, Civil,  
Agricultural, and Mechanical  
Engineering, University of  
Georgia, Athens, GA 30602, USA

**Dr. Jongwan Eun**

Department of Civil Engineering  
at the University of Nebraska-  
Lincoln (UNL), Lincoln, NE, USA  
68588-0531

**Dr. Soonkie Nam**

Department of Civil Engineering  
and Construction, Georgia  
Southern University, P.O. Box  
8077, Statesboro, GA 30460, USA

Deadline for manuscript  
submissions:

**closed (30 April 2021)**

### Message from the Guest Editors

President Franklin D. Roosevelt stated that “a nation that destroys its soils destroys itself.” Soils form over hundreds of years, and yet can be destroyed by a single event. Construction activities are an example of man-made hazards causing subsequent ground subsidence (i.e., underground cavity). However, man-made geotechnical hazards are an often-overlooked asset, despite being the foundation of urban geotechnical engineering. As such, the accurate acquisition of these assets is strategic for identifying and planning the most effective rehabilitation and maintenance works.

This Special Issue focuses on the current practices related to the aforementioned issues, which consider a wide-ranged geotechnical issues covering the following:

- Case studies of advanced seismic wave-based geo-characterization
- Simulation of propagating fractures using any standard numerical methods, including the finite element method
- Multiphase fluid flow for soil improvement
- Dynamic tunnel modelling by reflecting the operating conditions and ground conditions in real time
- Application of non-destructive technology to investigate urban geotechnical engineering issues.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Dr. Pedro Arias-Sánchez**

Applied Geotechnologies Group,  
Department of Natural Resources  
and Environmental Engineering,  
School of Mining Engineering,  
University of Vigo, 36310 Vigo,  
Spain

## Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
