submissions:  
**closed (30 November 2019)**

### Message from the Guest Editors

This Special Issue will illuminate the true state-of-the-art, the most significant challenges for future advancement, and the state-of-the-future in the field of infrastructure inspection. The Special Issue is designed to inform the public about the emerging challenges and opportunities for advanced technologies and methodologies, as well as to delineate considerations for practical implementation. The articles will not be limited to any one civil engineering domain, class of infrastructure, or inspection paradigm. The Special Issue will communicate the emerging capabilities and challenges that will help define structural sensing and monitoring over the next decades.

Examples include but are not limited to innovations in the following areas:

- Data collection, analysis, and management;
- Long-term monitoring;
- Post-disaster assessments;
- Sensors;
- Digital twin;
- Infrastructure maintenance;
- Infrastructure repair and retrofit strategies;
- Robotic-assisted inspections;
- Data-driven approaches;
- Augmented or virtual reality applications;
- Applications of additive or advanced manufacturing strategies.

an Open Access Journal by MDPI

## Editor-in-Chief

### Dr. Pedro Arias-Sánchez

Department of Natural Resources  
and Environmental Engineering,  
School of Mining Engineering,  
University of Vigo, 36310 Vigo,  
Spain

## Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Building and Construction)
