# **Advances in Fullerene Science**

Guest Editors:	Message from the Guest Editors
Prof. Dr. Zdeněk Slanina	Dear Colleagues,
Prof. Dr. Kyriakos Porfyrakis	Years ago (in 1985) fullerenes were observed and in 1990 prepared in macroscopic amounts. Fullerene science has
Prof. Dr. Nikos Tagmatarchis	constantly been developing and expanding over its original borders. And special issues on fullerenes, metallofullerenes, nanocarbons, graphenes, nanotubes,
Deadline for manuscript submissions: closed (20 June 2023)	etc., are always useful in such fast-growing field. <i>Inorganics</i> is now willing to publish such special issue - <i>Advances in Fullerene Science</i> - with contributions (original papers or shorter reviews) from all corners of fullerene science, and every fullerenist is welcome to contribute.

#### Prof. Dr. Duncan H. Gregory

School of Chemistry, University of Glasgow, University Avenue, Glasgow G12 8QQ, UK

#### Message from the Editor-in-Chief

Inorganic chemistry remains a lynchpin of modern chemistry, not only embracing the function and reactivity of combinations of most elements of the periodic table, but also providing a footing for studies of materials, catalysts, drugs, fuels and industrial chemicals. Arguably, the role and reach of inorganics in society have never been as great as today. Adventurous research at the heart and at the extremes of inorganic chemistry is vital to further advances and Inorganics offers authors the opportunity to publish exciting new research in an open access format.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Inorganic and Nuclear*) / CiteScore - Q2 (*Inorganic Chemistry*)
