Deadline for manuscript
submissions:

closed (31 January 2024)

Message from the Guest Editor

The aim of this Special Issue of *Inorganics*, entitled “Supramolecular inorganic chemistry”, is to address the most recent progress in the rapidly growing field of supramolecular inorganic chemistry. Both experimental and theoretical studies, fundamental and applied research, and any form of manuscripts (for example, reviews, mini-reviews, full papers, short communications, technical notes, and highlights) are welcome for consideration. This Special Issue will address the following bullet-point topics: experimental studies of non-covalent interactions in inorganic chemical systems; theoretical modeling of supramolecular inorganic systems; application of machine learning and artificial intelligence in studies of supramolecular inorganic chemical systems; development of catalysts involving supramolecular inorganic chemical systems; databases of supramolecular inorganic chemical systems; analytical techniques for detection of non-covalent interactions in inorganic chemical systems. We welcome researchers to contribute their works to our Special Issue.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Duncan H. Gregory

Message from the Editor-in-Chief

Inorganic chemistry remains a lynchpin of modern chemistry, not only embracing the function and reactivity of combinations of most elements of the periodic table, but also providing a footing for studies of materials, catalysts, drugs, fuels and industrial chemicals. Arguably, the role and reach of inorganics in society have never been as great as today. Adventurous research at the heart and at the extremes of inorganic chemistry is vital to further advances and *Inorganics* offers authors the opportunity to publish exciting new research in an open access format.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Inorganic & Nuclear*) / CiteScore - Q2 (*Inorganic Chemistry*)
