

## Special Issue

# Thermodynamic and Technical Analysis for Sustainability

### Message from the Guest Editors

Sustainability and sustainable development represent a present topic of investigation, with particular regards to their link to pollution, carbon dioxide emission and human well-being.

Sustainable development has been introduced in natural and environmental sciences, with the aim of attracting the interest of political and business stakeholders, in order to meet the needs of the present generations without compromising the ability of future ones.

In recent decades, research on sustainability has continuously been growing in number, with a great variety of interest: they are multidisciplinary topics of investigation.

In relation to sustainability, the air, water and soil pollution represents an actual problem of industrialized societies. So, this Special Issue wishes to focus on the fundamental topics of sustainability (environment, economy and society), with particular regards to the thermodynamic analysis of the biofuels and bioplastics production, in order to respond to the previous problems of pollution.

## About the Journal

### Message from the Editorial Board

The unique journal *Inventions* is different from all other journals. Many scholars spend their lives publishing research papers in many different journals, but most of these journals do not help scholars collate and analyze their results or assist in promoting them to a relevant industry. However, *Inventions* will help authors not only to publish their papers in the journal, but also to promote their research results to industry and assist them in realizing the purpose of technology transfer. In the future, *Inventions* will help authors to evaluate their technology license fees based on the valuation theory and approaches and also help authors to show their patents and technologies on a network transaction platform.

### Editors-in-Chief

Prof. Dr. Chien-Hung Liu

Department of Mechanical Engineering, National Chung Hsing University, 250 Kuo Kuang Rd., Taichung 402, Taiwan

Prof. Dr. Shouu-Jinn Chang

Department of Electrical Engineering, National Cheng Kung University, Tainan 701, Taiwan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.9 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
