Message from the Guest Editors

Dear Colleagues,

Arrhythmic risk stratification in nonischemic cardiomyopathies remains challenging for the clinical cardiologist. In the past, ejection fraction has been the indicator for defibrillator implantation in primary prevention. However, today, we know that we need to go beyond ejection fraction. Scientific evidence has documented the importance of genetics and cardiac MRI in proper arrhythmic risk stratification, but there are still many gray areas in this setting.

With this Special Issue, we ask you to share your experiences regarding proper arrhythmic risk stratification in patients with cardiomyopathy.

Dr. Marisa Varrenti

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease (JCDD)*, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Cardiac and Cardiovascular Systems) / CiteScore - Q2 (General Pharmacology, Toxicology and Pharmaceutics)
