Special Issue

Antithrombotic Therapy in Special and Overlooked Populations with Cardiovascular Diseases

Message from the Guest Editor

Guidelines often underrepresent real-life patients: the elderly, those with polypharmacy, cancer, chronic inflammation, or end-stage renal disease. This Special Issue aims at providing updated insights into the management of antithrombotic therapy in "difficult-to-treat" populations. Topics include adaptations in frail patients, cardio-oncology interfaces, antithrombotics in dialysis and transplant candidates, and management in rare or overlapping syndromes. Clinical studies, expert perspectives, and practical approaches are all welcome. You may choose our Joint Special Issue in *JCM*.

Message from the Editor-in-Chief

The primary goal of the *Journal of Cardiovascular Development and Disease* (*JCDD*, ISSN 2308-3425) is to provide cardiovascular scientists a platform to publish their work in a quick and efficient way. Topics can range from studies designed to decipher the events underlying early heart development to studies focusing on the origins of congenital and acquired heart disease. Papers submitted to *JCDD* undergo a fast, yet thorough, peer-review process. In this process, we will apply strict ethical policies and standards. *JCDD* guarantees fast dissemination of results to a large scientific audience

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) / CiteScore - Q2 (General Pharmacology, Toxicology and Pharmaceutics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
