Message from the Guest Editor

Dear Colleagues,

Anterior cruciate ligament (ACL) repair is a surgical procedure used to treat a common injury among athletes—a torn ACL. The ACL is a ligament that connects the thigh bone to the shin bone and helps stabilize the knee joint. During the procedure, the surgeon will remove the damaged tissue and replace it with a graft made from either the patient's own tissue or a donor's tissue. The new graft is then secured in place with screws or other devices. After the surgery, patients will need to undergo physical therapy to regain strength and mobility in the knee joint.

This Special Issue focuses on the clinical aspects and practices related to ACL repair, covering a wide range of topics including diagnosis, treatment, and rehabilitation of ACL injuries. The goal of this Special Issue is to provide healthcare professionals, surgeons, and researchers with a comprehensive understanding of the clinical management and practices involved in ACL repair. Ultimately, this knowledge will enhance patient outcomes and improve overall care for individuals with ACL injuries.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
