submissions:

30 September 2024

Message from the Guest Editors

Dear Colleagues,

Accurate and timely diagnosis is critical for the effective management of lung cancer, the leading cause of cancer-related mortality worldwide. This Special Issue of the *Journal of Clinical Medicine* will provide an overview of the latest developments in the clinical diagnosis of lung cancer. We welcome original research and comprehensive reviews that showcase recent advances across the continuum of lung cancer diagnosis—from screening and early detection to molecular testing and biomarker discovery. Key topics to be covered include the implementation of lung cancer screening programs, the comparative effectiveness of different imaging modalities, innovations in endoscopic techniques and minimally invasive staging, the role of liquid biopsies, and the validation of emerging molecular biomarkers.

This issue aims to promote multidisciplinary collaboration and the adoption of best practices. The goal is to achieve earlier diagnosis, more accurate subtyping, and improved staging. The insights presented may aid clinicians in selecting optimal treatment approaches and personalized monitoring strategies.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
