Message from the Guest Editor

Dear Colleagues ,

Pelvic floor disorders, such as pelvic organ prolapse, urinary incontinence, fecal incontinence, etc., are surprisingly common and represent a growing health problem in women across the globe. These types of diseases impose obvious symptoms, which adversely affect the lives of millions of women both physically and psychologically.

The therapeutic approaches to treat these disorders include non-surgical and surgical treatments. Over the past few decades, pelvic floor surgery has experienced significant improvements and continues to evolve. In addition, it can be tailored to suit the individual needs of each patient. In addition to the traditional approach, minimally invasive and robot surgeries have also become more common.

This Special Issue aims to collect state-of-art research on urogynecology and pelvic floor surgery. Original articles, reviews, and communications are welcome. We look forward to receiving your contributions.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
