Message from the Guest Editor

Dear Colleagues,

A cerebrovascular accident (CVA) is a common neurological emergency and a major worldwide cause of mortality and disability affecting millions of patients annually in modern society. Except for CVA, other neurological diseases such as spinal cord disease, infection or autoimmune diseases of the central nervous system, epilepsy and neuromuscular junction disorders are also common in emergency medicine, and each disease has its heterogeneity in etiology, pathophysiological process and clinical manifestations. To further improve the clinical management, more lab findings and transformation practice are essential and urgent. This research field covers a large area of neuroscience and neuropharmacology research, including a broad range of topics related to laboratory and clinical research.

This Special Issue welcomes all types of articles providing new insights from experimental models and clinical studies about CVA and neurological disease in emergency medicine, with a focus on targets for pharmacological intervention and novel approaches.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
