submissions:

15 February 2025

Message from the Guest Editor

Dear Colleagues,

Catheter ablation is an effective treatment option for cardiac arrhythmia. For decades, there have been remarkable advancements in mapping and ablation techniques and technology, helping clinicians further understand the mechanism of arrhythmias, in order to facilitate procedures, and to improve the safety of ablation and patients' clinical outcomes. The aim and scope of this Special Issue mainly focus on, but are not limited to, the following: current mapping and ablation techniques for arrhythmias, procedural endpoints and outcomes, procedural complications, and prevention strategies. We welcome original research, systematic reviews, state-of-the-art reviews, challenging/informative case series, challenging/informative images in mapping and ablation, new technologies, etc.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
