Message from the Guest Editors

Dear Colleagues,

Atopic eczema and dermatitis affect diverse ethnic groups with substantial ethnic disparities in the prevalence, treatment, progression and outcomes of AD conditions. Elucidating the mechanisms underlying these group differences is of crucial importance in reducing and eliminating disparities in treatment of atopic eczema. In recent years accumulating evidence has identified a variety of immune factors and genetic polymorphism that influence the susceptibility to AD and response to treatment. We now understand that in Black and Asian individuals AD is more frequent and could be more severe. Few studies have been conducted in Hispanic skin. Unfortunately, most of the studies are conducted in individuals of European ancestry.

In this special edition we review differences in epidemiology, clinical phenotype and treatment of AD in multiple ethnic groups and races. We highlight the mechanisms behind these differences including cellular, molecular, immunological, physiological therapeutic and sociocultural mechanisms explaining the disparities in AD.

We look forward to your submissions!

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
