Message from the Guest Editors

Oral and maxillofacial diseases represent a major health burden for many countries, and affect people throughout their lifetime, causing pain, discomfort, disfigurement, and even death. An in-depth understanding of the pathogenesis, diagnosis, and treatment of different oral diseases is vitally important for the maintenance of public oral health. Targeted therapy is a hot topic in the research of disease treatment strategies. The advantage of targeted therapy is that it can accurately focus the disease site, thus reducing the side effects brought by treatment. The introduction of targeted therapy into oral and maxillofacial diseases is also a hot issue in the field of oral science.

This Special Issue will be entitled "Targeted Treatment of Oral and Maxillofacial Diseases", and will focus on the treatment mechanisms and new targeted treatment strategies for the targeted treatment of oral and maxillofacial diseases. Authors are welcome to share experimental papers and review articles presenting the state of the art and new data.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
