Message from the Guest Editor

Despite the significant improvement of cardiogenic shock and cardiac arrest care, resuscitating these patients is still challenging. Cardiac arrest is also a complex lethal condition with a public health burden due to irreversible functional disability. Therefore, better resuscitation strategies are necessary.

Another issue of cardiogenic shock and cardiac arrest is quickly obtaining reliable information on the probability of good neurological outcome. A reliable prognostic tool would be very helpful to tailor medical therapies to the appropriate patients.

This Special Issue of the *Journal of Clinical Medicine* on “Cardiac Arrest and Cardiogenic Shock: Resuscitation Strategy and Prognosis” aims to collect brilliant contributions from worldwide experts in the field of resuscitation for cardiac arrest and cardiogenic shock. Invited topics include clinical management and prognosis of cardiogenic shock, resuscitation strategies, prediction of good neurologic outcome, trends in resuscitation outcomes, resuscitation modalities, and post-resuscitation care.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
