Deadline for manuscript submissions:

closed (25 May 2024)

Message from the Guest Editors

Inflammatory skin diseases represent the largest class of skin disease. Among inflammatory skin diseases, atopic dermatitis in particular causes a high disease burden, and encompasses also the pediatric field. In addition, other eczematous diseases are exhibited. In this Special Issue, the submission of articles providing a detailed outline of the pathogenetic mechanisms involved, either autoimmune or in response to infectious diseases, as well as these diseases' complications, diagnosis and therapy, is welcome. Inflammatory dermatoses, especially if chronic, highly impact the life quality of patients and still present many unsatisfied needs; therefore, continuous therapeutic evolution deserves in-depth debate and space in this Special Issue.

As for infectious diseases of the skin, these are indeed closely connected with cutaneous inflammatory diseases. In fact, there are many systemic infections that may cause inflammatory skin conditions.

Overall, this Special Issue aims to provide an update on the most recent research in the field of inflammatory and infectious skin diseases and their possible interconnections, pathogenesis, complications, and therapies.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
