Message from the Guest Editors

Dear Colleagues,

This Special Issue of the Journal of Clinical Medicine will highlight the latest in the diagnosis and treatment of acute coronary syndromes (ACS). Coronary disease is one of leading causes of morbidity and mortality worldwide. During the last few years, new advances have been developed in the diagnosis and management of ACS. These cover evaluation from the prehospital setting, including novel-biomarker kits, throughout evaluation at the bedside in the hospital and management following discharge. The acute management, including percutaneous coronary interventions, modern antiplatelet medications, lipids lowering therapies, as well as the use of traditional and novel risk scores. Sex differences are also a contemporary focus in the evaluation and management of these patients.

This Special Issue provides researchers with the opportunity to publish both original research and review articles related to recent advances in the field of ACS, with a particular focus on new diagnostic methods for risk stratification, innovative imaging studies for diagnosis and management of patients with an ACS, novel antiplatelet drugs, and the use of precision medicine.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
