Message from the Guest Editor

Dear Colleagues,

Although initially focused on burn patients, in recent years, wound healing has become an increasingly pressing challenge due to the increase in cases of so-called ulcerative pathologies, which we could define as a silent epidemic.

Nowadays, in order to achieve the best possible wound healing, we have to overcome many challenges by incorporating new technologies, advanced dressings, surgical therapies, dermal matrices, and regenerative medicine.

In this Special Issue, we aim to present innovative studies in the field of wound healing, in order to create a new strategy for the treatment of acute and chronic wounds both in adults and in children.

Dr. Carlotta Scarpa

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
