submissions:

**28 February 2025**

### Message from the Guest Editors

Endometriosis and adenomyosis are common benign gynecological disorders that affect reproductive-aged women. Both conditions share a histologic pattern, displaying the presence of ectopic endometrial tissue in unusual locations, and are associated with adverse reproductive outcomes. The heterogeneity of endometriosis and adenomyosis, as well as their frequent coexistence, contribute to the variability in available evidence. Proposed reasons for its association with adverse reproductive outcomes include disrupted pelvic anatomy, chronic pelvic inflammation, and reduced ovarian reserves for endometriosis, while uterine inflammation, abnormal contractility, and abnormal endothelial function are suggested to be causes of adenomyosis. We invite our colleagues to submit work focused on relevant topics, such as the role of surgery in infertility based on different subtypes of endometriosis and adenomyosis, the hormonal pretreatment in assisted reproductive technology, fertility preservation, and their coexistent clinical

## Editors-in-Chief

### Prof. Dr. Emmanuel Andrès

Internal Medicine Department,  
University Hospital Strasbourg,  
67000 Strasbourg, France

### Prof. Dr. Kent Doi

Department of Acute Care  
Medicine, University of Tokyo,  
Tokyo, Japan

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / Citescore - Q1 (General Medicine)

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out online!
