Deadline for manuscript submissions:
closed (31 August 2023)

Message from the Guest Editors

Acute kidney injury (AKI) is a common complication of sepsis, which is associated with higher risks of adverse outcomes. Despite the identification of several cellular mechanisms thought to underlie the development of organ damage in septic patients, the pathophysiology of AKI is still poorly understood.

The purpose of this Special Issue is to publish high-quality research papers as well as review articles addressing recent advances in S-AKI. Original, high-quality contributions that are not yet published or that are not currently under review by other journals or peer-reviewed conferences are welcome.

Potential topics include, but are not limited to:

- New insights on sepsis-associated AKI development
- Identification of new biomarkers S-AKI
- Identification of new potential therapeutic targets
- Early identification of organ dysfunction in septic condition
- Stratification of high-risk patients
- Prognostic value in critical condition S-AKI
- CRRT for sepsis-induced acute kidney injury
- Extracorporeal blood purification therapies
- Follow-up after acute illness
- Kidney function recovery after a septic event

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
