closed (20 April 2024)

Message from the Guest Editor

The purpose of this Special Issue is to provide additional findings regarding the management of life-threatening end-stage HF with the aim to enhance the theoretical and practical knowledge of those engaged in this particularly demanding and still highly topical field of cardiovascular medicine.

The topics expected to be addressed by the authors should, therefore, be linked to MCS therapy and/or HTx in patients with advanced HF of different etiologies (e.g., pathophysiological aspects, diagnostic challenges, surgical procedures, risks and complications, perioperative management, long-term surveillance and outcomes, etc.).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
