Message from the Guest Editor

Dear Colleagues,

Recent advances in diagnostic imaging and molecular methods have changed the management of rheumatic diseases; Sjögren's syndrome (SS) is not an exception. Ultrasound, which is a tool used to detect synovitis of rheumatoid arthritis, is reported to be also useful for the diagnosis of SS. Expressions of noncoding RNAs in patients with SS have been investigated as disease biomarkers. New immunosuppressive drugs such as biological agents and janus kinase inhibitors have been studied as potential therapeutic options. In this Special Issue, we welcome authors to submit papers on the advances in the diagnosis and treatment of SS in terms of both molecular methods and clinical practice.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
