Deadline for manuscript submissions:

5 November 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the relationship between endodontics and orthodontics, a topic which has gained increasing amounts of attention in recent decades. The relationship covers various aspects, including how orthodontic movements impact pulp and periapical tissues, the potential risks of various kinds of root resorptions during orthodontic procedures, and the timing of postendodontic orthodontic procedures. Additionally, the impact of root canal treatments on the orthodontic movement is increasingly being discussed. Despite the importance of these topics, the existing literature lacks comprehensive information on these connections, and the practical clinical guidelines have inconsistencies. The goal of this Special Issue is to address these gaps through presenting reviews based on the existing literature, along with analyses of treated cases. This will provide various treatment approaches, with the aim of simplifying complex treatment plans for dentists who are dealing with these challenges in daily practice. The overall intention is to provide practitioners with practical tools and algorithms for integrated endodontic and orthodontic treatments.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
