Message from the Guest Editors

Dear Colleagues,

Lung transplantation has evolved rapidly in recent years. While the COVID-19 pandemic produced a completely new set of candidates for lung support and replacement, new techniques in organ preservation have expanded the pool of available donor organs. Extracorporeal perfusion and preservation of donor organs provide the possibility to measure organ function and improve organ quality. As ECMO has generally evolved as a much safer technology to support patients in advanced lung failure, pre- and post-transplant mechanical support is taking on a bigger role in lung transplantation. Improvements in intensive care and pre- and post-transplant rehabilitation have had a significant impact on early and long-term success.

These topics will be addressed in this Special Issue. The papers will be designed to give the internal medicine practitioner a solid understanding of where lung transplantation stands today and what benefits can be expected for patients suffering from end-stage lung disease.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
