Message from the Guest Editor

Dear Colleagues,

Chronic kidney disease (CKD) has become an enormous worldwide health problem. Delaying CKD progression to avoid kidney failure will lead to new optimized models of care. This Special Issue of the Journal of Clinical Medicine aims to highlight the latest findings in the management of CKD, including strategies that can be employed to identify risk factors for the progression of CKD. We welcome high-quality original studies that address the early detection, prognosis, personalized treatment, medication management, and practice guidelines of CKD, and those that concern any conditions related to chronic kidney disease. We encourage the reporting of sex- and gender-specific analyses in all studies submitted. We look forward to receiving your contributions.

Keywords:

- chronic kidney disease
- CKD progression
- CKD prevention
- CKD risk assessment
- CKD medication management

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
