Message from the Guest Editors

Nowadays, endoscopic procedures, including endoscopic retrograde cholangiopancreatography (ERCP) and endoscopic ultrasound (EUS), are essential in the diagnosis and treatment of pancreaticobiliary diseases. While rapid progress has been made in the development and use of these techniques, many unresolved issues still exist. Thus, it is necessary to identify these issues and conduct various well-designed studies. Moreover, in terms of treatment, new advanced methods, such as interventional EUS, cholangioscopic/pancreatoscopic-related procedures, balloon enteroscopy-assisted ERCP, and endoscopic radiofrequency ablation, have been developed in recent years, spurring significant progress. In order to further standardize and accelerate the use of these techniques, it will be necessary to accumulate evidence, refine existing techniques, and develop more sophisticated devices.

In this Special Issue, we sincerely welcome authors to submit any type of paper, such as research articles, review articles, and case series studies, relating to the endoscopic diagnosis and treatment of pancreaticobiliary disease.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
