Message from the Guest Editor

Dear Colleagues,

In the last decade, there have been significant advances in the imaging techniques, biomarkers, treatment, and rehabilitation of ischemic stroke patients. Currently, the use of intravenous thrombolysis and endovascular thrombectomy in select patient cohorts has become the standard of care globally. This has translated into significant improvements in functional outcomes and reduced disability. However, the burden of ischemic stroke remains high, and ischemic stroke is still a leading cause of disability and mortality. The aim of this Special Issue is to feature recent advances in the context of the evaluation, imaging, treatment, and prognostication of patients with acute ischemic stroke.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
