Message from the Guest Editors

Dear Colleagues,

HIPEC (hyperthermic intra peritoneal chemotherapy) has emerged as an option in the management of recurrent ovarian cancer and is under investigation as a first-line treatment. Sentinel lymph node biopsy has become a standard of care in early endometrial cancer, while the decision for adjuvant treatment is more and more guided by the risk profile of the endometrial cancer determined by both the histopathologic and the molecular classification of the tumor. The surgical approach (open surgery versus minimal invasive surgery) and the type of hysterectomy for cervical cancer have been questioned in both the LACC and the SHAPE trials.

We propose, in this Special Issue, to address most of the novel medico-surgical strategies in the treatment of gynecological cancer. We also propose presenting original results such as the impact of inflammation during debulking surgery for ovarian cancer on patients' survival.

Keywords:

- gynecological cancer
- surgery
- minimally invasive surgery
- novel strategy
- quality of life
- fertility

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
