Deadline for manuscript submissions:

closed (20 December 2023)

Message from the Guest Editors

The recent progress made in reproductive endocrinology is remarkable. On the other hand, the transition from the bench to the bedside in reproductive medicine is often too fast, and does not wait for all of the necessary evidence regarding efficacy and safety. Clinicians as well as their patients are often overwhelmed by the large amount of information, and struggle to orient themselves. In order to fill this gap, at least partially, the purpose of this Special Issue is to provide information on the state of the art regarding some of the most debated aspects in the field of reproductive endocrinology. In this Special Issue, we invite authors to submit papers focused on the following issues: i) endometriosis: diagnosis and management of affected patients; ii) idiopathic recurrent pregnancy loss: advancements in diagnosis and treatment; iii) controlled ovarian stimulation for in vitro fertilization: a focus on non-conventional stimulation protocols; iv) add-ons for repeated embryo implantation failure: evidence beyond a biological rationale; and v) pre-implantation genetic testing (PGT).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
