submissions:

25 October 2024

Message from the Guest Editors

Dear Colleagues,

Psoriasis is a common, chronic, inflammatory, immune-mediated disease, primarily affecting the skin. It is characterized by abnormalities in innate and acquired immunity, hyperproliferation, and abnormal differentiation of epidermal keratinocytes.

Psoriasis is a systemic, multifactorial disease associated with psoriatic arthritis in approximately one-third of patients, so early recognition and effective treatment are critical for patients. In addition, people with severe psoriasis are at higher risk for metabolic and cardiovascular disease. The development of new effective treatments for psoriasis has changed the prognosis and the life of many patients around the world, but there is a strong need for more real-world experiences of these drugs

This Special Issue entitled “Cutting-Edge Research on Psoriasis” is now open for submissions, welcoming both original researches and reviews that describe the latest treatment strategies and clinical management approaches related to psoriasis.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
