Deadline for manuscript submissions:

**closed (1 November 2023)**

### Message from the Guest Editor

Dear Colleagues,

Radiomics is an emerging field that focuses on the extraction of quantitative features from radiological images to predict clinical outcomes. Deep learning algorithms can be trained to analyze large amounts of imaging data, identify subtle patterns, and generate predictive models that can be used to facilitate clinical decision making. The integration of radiomics with deep learning has the potential to revolutionize radiology by improving diagnostic accuracy, enabling personalized treatment, and facilitating the development of precision medicine. Radiomics and deep learning have already shown promising results in cancer diagnosis and treatment planning, but there are still challenges to be addressed, e.g., to standardize radiomic features, to optimize deep learning algorithms, and to deploy these tools into clinical practice. Despite these challenges, radiomics and deep learning present exciting opportunities for innovation and progress in radiology, and we encourage the submission of papers that consider innovative approaches in this field for this Special Issue.

an Open Access Journal by MDPI

## Editors-in-Chief

**Prof. Dr. Emmanuel Andrès**

Internal Medicine Department,  
University Hospital Strasbourg,  
67000 Strasbourg, France

**Prof. Dr. Kent Doi**

Medicine, University of Tokyo,  
Tokyo, Japan

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
