Vanvitelli”, 80131 Naples, NA, Italy

Deadline for manuscript
submissions:

20 February 2025

Message from the Guest Editor

Obesity is nowadays considered a worldwide epidemic condition, and bariatric surgery is one of the most effective available treatments, in addition to emergent medications and lifestyle changes. In this respect, thousands of bariatric procedures (restrictive, malabsorptive, and mixed) are currently being performed around the world, with an exponentially increasing trend and outcome. Several authors, in fact, largely demonstrated the remission of obesity’s comorbidities (i.e., hypertension, diabetes, and hyperuricemia) with long-lasting results. Conversely, with the widespread use of surgical bariatric procedures, several sequelae have been largely reported, such as the de novo gastroesophageal reflux disease after sleeve gastrectomy or the biliary reflux after one anastomose gastric bypass.

The scope of this Special Issue is to provide an overview of recent advances in the field of bariatric surgery, especially focusing on the technical refinement and new surgical approaches able to reduce the abovementioned complications.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
