Message from the Guest Editor

The journal JCM launched a Special Issue titled "Fractures of the Pelvis and Acetabulum: Novel Insights in Diagnostics and Treatment".

Surgical management of pelvic and acetabulum fractures can be challenging. Nowadays, the majority of fractures of the pelvis and acetabulum occur in elderly patients after simple falls. Poor bone quality and frailty are complicating the management of these fractures. However, innovative instruments and anatomic implants have led to significant improvements in the treatment of pelvic and acetabulum fractures. New applications such as automated fracture detection, three-dimensional planning, surgical navigation, and additive manufacturing of surgical instruments are just the beginning of a digital revolution in pelvic and acetabulum fracture management. Prospective studies on patient-related outcome measurement (PROM) have to prove the superiority of these new applications.

This Special Issue puts a spotlight on novel insights in diagnostics and treatment of fractures of the pelvis and the acetabulum.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
