submissions:

22 November 2024

Message from the Guest Editor

Psoriatic arthritis, as part of the whole psoriatic disease spectrum, is one of the most challenging immune-mediated inflammatory diseases (IMIDs). This is mainly due to the large heterogeneity of clinical rheumatological expression and its destructive potential, but also to the association of extra-musculoskeletal manifestations and comorbidities that could impact patient perspectives. The complexity of this condition explains the frequent need to utilize multidisciplinary teams, including rheumatologists, dermatologists, internal medicine specialists, cardiologists, psychotherapists, and more. Fortunately, it can be said without exaggeration that recent years have brought amazing therapeutic advances that have significantly changed the management and prognosis of these patients.

This Special Issue focuses on the latest advances in pathogenesis and treatment but also clinical and management challenges, unmet needs, and controversies. The goal is to significantly improve knowledge about psoriatic disease to contribute to a better patient prognosis.

- psoriatic arthritis
- psoriasis
- enthesitis

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
