Message from the Guest Editors

Endoscopic Middle ear surgery(EES) has been around for a while now and yet there is still a lot of scepticism behind its real value and whether it can fully or partially replace classic Microscopic ear surgery. For the last decade there are more Endoscopic ear surgery courses than traditional temporal bone courses for young aspiring ear surgeons eager to learn otology.

The aim of this special issue is to cover all issues related to EES aspects. Examples of topics include, but are not limited to:

- Endoscopic Tympanoplasty
- Endoscopic Ossiculoplasty
- Endoscopic Stapes Surgery
- Endoscopic Cochlear Implantation
- Endoscopic Mastoid Surgery
- Truly Scarless Endoscopic Ear Surgery with synthetic Grafts
- Issues of Training: Endoscopic Ear Surgery Courses v "Traditional" Temporal Bone Courses etc

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
