Message from the Guest Editors

Dear Colleagues,

Dental implants are now the state of the art in dental restorative therapy. They are used in the replacement of missing teeth, and provide retention and support for prostheses. The 21st century has brought permanent surgical innovation and vast clinical experience, resulting in the development of several techniques in the various areas of implant dentistry.

The continuous development of digital implant surgery has led to a more predictable surgical evaluation of the implant recipient site. Cone-beam computed tomography scanning and modeling software have allowed clinicians to virtually plan treatment. In particular, prosthetically guided approaches to implant insertion, fully digital, are currently a possible and recommended alternative. Dental implant surgical planning has evolved from using static guides to computer generated guides and dynamic surgical guidance. Dynamic surgical placement has started gaining traction with the use of navigated surgery and robot-assisted implant placement.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
