Message from the Collection Editor

Dear Colleagues,

Many systemic diseases have ocular manifestations, including diabetes mellitus, fibromyalgia, Gulf War syndrome, and Sjögrens syndrome, to name a few. In fact, it is not uncommon for eye findings to prompt a diagnosis and/or direct therapy of a systemic condition. Given the importance of ocular manifestations as potential biomarkers for systemic diseases, the potential morbidity of systemic diseases to the individual and society, and the impact of chronic diseases on health care costs, it is imperative for clinicians to understand the relationships between systemic diseases and eye findings and further understand how these relationships can be translated into better diagnostic and therapeutic algorithms on both an individual and population level.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
