submissions:

30 September 2024

Message from the Guest Editor

Dear Colleagues,

Maxillo-facial surgery is a fascinating surgical branch that often faces challenging clinical scenarios. A modern approach to the oro-maxillofacial area requires refined surgical skills and the handling of modern tools offered by technology. Today, we can combine volume and form with function and aesthetics with the aim of improving the patient's quality of life.

In fact, the expectations of today's patients have shifted from a mere replacement of the lost tissue to the desire to restore vital functions, facial appearance and psychological wellness as best as possible.

This new wave of holistic approach to the global health of patients should be applied in all the fields of our surgical discipline, from post-oncological reconstruction and orthognatic surgery, facial paralysis reanimation and even to ethic aesthetic surgery.

The aim of this Special Issue is to emphasize all these improvements through the publication of papers from authors that support all these previous statements with solid scientific evidence. Clinical papers and reviews are all highly encouraged for submission.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
