Message from the Guest Editor

Dear Colleagues,

One year later, the COVID-19 pandemic is still ongoing and the capacity of intensive care departments is one of the determinants of political decisions. However, many advances have been made in the care of ICU COVID-19 patients in one year, regarding specific drugs, the use of respiratory devices and respiratory settings, and the diagnosis and care of associated critical complications (e.g., neurological, cardiac, thromboembolic). Local and territorial organization, the protection of caregivers, the impact of sanitary protocols on the next-of-kin, and the impact of COVID-19 care on the other usual critical care pathologies are also crucial questions. The typology and prognosis of patients have also changed in the course of one year.

This Special Issue aims to describe these physiopathological, diagnostic, and therapeutic advances in the specific population of critically ill patients.

We are looking forward to receiving your original articles, reviews, and short communications about this hot topic!

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
