University of La Plata, CONICET,
La Plata 1900, Argentina

Deadline for manuscript
submissions:

closed (25 June 2024)

Message from the Guest Editors

The physiological mechanisms underlying neurostimulation are not yet fully understood. Measuring neurophysiological responses to stimulation (magnetoencephalography (MEG), functional magnetic resonance imaging (fMRI), or electroencephalography (EEG), electromyography (EMG), among others) can help us to better understand the neurological mechanism and main factors contributing to better clinical outcomes. Computational physics has also permitted quantifying and determining the interaction of physical quantity (i.e., induced electric field) on the target neural elements as the basis of the neuromodulation process, while optimizing the simulation parameters.

This Special Issue welcomes advances in understanding the mechanistic foundations of neurostimulation, proposals of novel or enhanced methodologies, and clinical applications through *in vivo*, *in vitro*, *ex vivo*, *in silico* and simulation studies. Original research articles and systematic reviews/meta-analyses are welcomed.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
