Message from the Guest Editors

Dear Colleagues,

Ischemic heart disease, or coronary artery disease, is the leading cause of death and disability worldwide. Moreover, its importance is expected to increase in the coming years, due to population aging, increasing hypertension in developing countries, and the global growth in obesity. This Special Issue focus on the recent advances on the management of ischemic heart disease and the expected improvements in the diagnosis and treatment of these patients. We aim to include all diagnostic and treatment modalities already available, and future innovations from a broad perspective including clinical medicine, percutaneous interventions, biotechnology, artificial intelligence, tissue engineering, stem cells, nanotechnology, surgery and robotic surgery, 3-D printing, among others.

Prof. Dr. Manuel Martínez-Sellés

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
