closed (20 January 2024)

Message from the Guest Editor

Dear Colleagues,

Female urology is a sub-specialty of Urology, and it covers a group of conditions that are experienced by women with a deep influence on their quality of life.

This evolving field is powered by significant advances in areas including urinary incontinence, recurrent UTIs, overactive bladder, pelvic organ prolapses, pelvic floor disorders, bladder pain syndrome, urinary tract fistulae, and urinary microbiome.

Many healthcare professionals, such as urologists, gynecologists, nurses, and physiotherapists, are involved in the management of women affected by these urological diseases supporting an interdisciplinary approach to achieve the best results for women.

In the last few years, following clinical and translational research, many innovations (robot-assisted surgery, mini-invasive procedures, and new conservative pharmacological solutions) have been introduced in real-life practice with great impact on personal and public health.

Despite the availability of several international guidelines, there are some uncovered “grey zones” that require further clinical experience and a more accurate scientific debate.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
