Message from the Guest Editors

Sarcoidosis is a granulomatous disease that can affect every body organ to a different extent. The diagnostic role of imaging, such as computed tomography and magnetic resonance, is to reveal the presence of parenchymal infiltrates, lymphadenopathy, and also by documenting organ enlargement, nodular lesions, and patchy infiltration in extrapulmonary sites. The use of conventional ultrasound but even more that of contrast-enhanced ultrasound (CEUS) has been demonstrated to be useful to detect occult lesions and to describe the characteristics of some nodules that are not otherwise evident on the baseline examination. Finally, recent studies have highlighted that FDG PET/CT is also useful in staging the disease, in order to assess the presence of occult lesions, disease extent, treatment response and to identify the most suitable site for biopsy.

The aim of this Special Issue is to report an overview of the latest research on the diagnosis of Sarcoidosis.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
